SUMMARY

M.Sc. Bioinformatics candidate with hands-on experience in molecular docking, virtual screening, protein–ligand interaction analysis, and bioinformatics workflows. Skilled in Python, SQL, machine learning, and biological data analysis, with research experience in structure-based drug discovery and processing large-scale biomedical datasets. Seeking opportunities in bioinformatics, computational biology, or life science data analytics.

EXPERIENCE

Computational Biology Intern

Dec '25 — Jan '26

Growdea Technologies Pvt. Ltd

GURUGRAM, India

- Processed and structured 50,000+ pharmaceutical records using Python (pandas) and regex-based text mining, improving data readiness by ~40%.
- Managed 3+ in-silico pipelines, enhancing data processing efficiency by 30% ..

EDUCATION

Master of Science in Bioinformatics, Maharshi Dayanand University

Aug '24 — Present

Rohtak, India

- Dissertation Project – In silico Evaluation of Phytochemicals for Combating Antibiotic Resistance in *Klebsiella pneumoniae***
 - Conducted structure-based virtual screening and molecular docking of **102 phytochemicals** (filtered from **36,464 compounds**) against **PBP1A, PBP1B, and PBP3**.
 - Applied **protein structure validation, active-site identification, interaction analysis, and ADMET profiling** using **AlphaFold2, UCSF Chimera, AutoDock 4.2, RACCOON, LigPlot+, and Discovery Studio**.

Bachelor of Science in Biotechnology, Dronacharya Govt. College (GPA: First Division)

Jul '21 — Jul '24

Gurugram, India

- Built a strong foundation in molecular biology, microbiology, biochemistry, genetic engineering, and bioinformatics. Gained hands-on experience in DNA isolation, PCR, agarose gel electrophoresis, microbial culture, and basic data analysis.

ACADEMIC PROJECTS

Hospital Overview Dashboard, Power BI

2026 — 2026

- Built a 3-page interactive Power BI dashboard on a healthcare dataset, analyzing 200+ appointments and ₹551K revenue; enabled faster decision- making through KPI visualization and trend analysis.

Machine Learning Pipeline - Biomedical Text Analytics, Orange Data Mining

2025 — 2025

- Developed end-to-end machine learning workflows for biomedical text preprocessing, classification, and interpretation; achieved 85%+ accuracy and improved model performance through optimized feature selection.

Machine Learning on Diabetes Dataset, WEKA

2024 — 2024

- Implemented classification algorithms (Naive Bayes, Decision Tree, SVM) on a 768-record diabetes dataset; performed EDA and feature engineering, improving prediction accuracy by 12%.

Drug Discovery & Molecular Docking, HEX

2025 — 2025

- Designed molecular docking workflow using HEX; analyzed protein-ligand interactions and prepared chemical structures using UCSF Chimera and ChemSketch.

Python Programming Projects (GitHub Portfolio) | 2026

- Developed multiple command-line Python applications, including Blackjack, Hangman, Calculator, Secret Auction, and Password Generator. Applied core programming concepts such as functions, loops, conditional statements, dictionaries, and modular code organization.

CERTIFICATIONS

Mckinsey Forward Program, Mckinsey Company
