SUMMARY

M.Sc. Bioinformatics graduate with a strong foundation in genetics, genomics, and computational biology. Skilled in Python, SQL, NGS data analysis, pharmacogenomics, and biological data interpretation, with hands-on experience in Galaxy workflows, variant analysis, molecular docking, and machine learning. Proactive and quick learner with strong communication skills and a growth mindset, seeking to contribute to innovative bioinformatics and genomics projects in precision medicine.

EXPERIENCE

Computational Biology Intern

Dec '25 — Jan '26

Growdea Technologies Pvt. Ltd

GURUGRAM, India

- Processed and structured 50,000+ pharmaceutical records using Python (pandas) and regex-based text mining, improving data readiness by ~40%.
- Managed 3+ in-silico pipelines, enhancing data processing efficiency by 30% ..

EDUCATION

Master of Science in Bioinformatics, Maharshi Dayanand University

Aug '24 — Present

Rohtak, India

- Dissertation Project – In silico Evaluation of Phytochemicals for Combating Antibiotic Resistance in *Klebsiella pneumoniae***
 - Conducted structure-based virtual screening and molecular docking of **102 phytochemicals** (filtered from **36,464 compounds**) against **PBP1A, PBP1B, and PBP3**.
 - Applied **protein structure validation, active-site identification, interaction analysis, and ADMET profiling** using **AlphaFold2, UCSF Chimera, AutoDock 4.2, RACCOON, LigPlot+, and Discovery Studio**.

Bachelor of Science in Biotechnology, Dronacharya Govt. College (GPA: First Division)

Jul '21 — Jul '24

Gurugram, India

- Built a strong foundation in molecular biology, microbiology, biochemistry, genetic engineering, and bioinformatics. Gained hands-on experience in DNA isolation, PCR, agarose gel electrophoresis, microbial culture, and basic data analysis.

ACADEMIC PROJECTS

Comparative Population Pharmacogenomic Analysis of Whole Exome Sequencing Data Using Galaxy

Present

- Analyzed whole exome sequencing data from the [1000 Genomes Project](#) using the [Galaxy Platform](#) to identify and compare pharmacogenomic variants in key genes (CYP2D6, CYP2C19, VKORC1) across global populations to evaluate their impact on drug response and personalized medicine.

Machine Learning Pipeline - Biomedical Text Analytics, Orange Data Mining

2025 — 2025

- Developed end-to-end machine learning workflows for biomedical text preprocessing, classification, and interpretation; achieved 85%+ accuracy and improved model performance through optimized feature selection.

Machine Learning on Diabetes Dataset, WEKA

2024 — 2024

- Implemented classification algorithms (Naive Bayes, Decision Tree, SVM) on a 768-record diabetes dataset; performed EDA and feature engineering, improving prediction accuracy by 12%.

Python Programming Projects (GitHub Portfolio)

- Developed multiple command-line Python applications, including Blackjack, Hangman, Calculator, Secret Auction, and Password Generator. Applied core programming concepts such as functions, loops, conditional statements, dictionaries, and modular code organization.

Drug Discovery & Molecular Docking, HEX

2025 — 2025

- Designed molecular docking workflow using HEX; analyzed protein-ligand interactions and prepared chemical structures using UCSF Chimera and ChemSketch.

Hospital Overview Dashboard, Power BI

2026 — 2026

- Built a 3-page interactive Power BI dashboard on a healthcare dataset, analyzing 200+ appointments and ₹551K revenue; enabled faster decision-making through KPI visualization and trend analysis.

CERTIFICATIONS

AI & Machine Learning in Pharmaceutical Sciences, Maharshi Dayanand University, Rohtak

Jun '25

Poster Presentation on Next-Generation Sequencing (NGS), Maharshi Dayanand University, Rohtak

Tata Group Data Analytics Job Simulation , Forage

Jun '25

Deloitte Australia Data Analytics Job Simulation , Forage	Jun '25
Introduction to Cloud Computing , Simplilearn	Mar '26
Hands-on Workshop on Bioinformatics & Molecular Docking , BioSoc-DTU	Apr '25
Mckinsey Forward Program , Mckinsey Company	Jul '25
Complete SQL Bootcamp , Udemy	Feb '26

SKILLS

Technical Skills Galaxy, Pharmacogenomics, Genomic Analysis, Molecular Docking, Virtual Screening, Protein-Ligand Interaction, ADMET, BLAST, NGS Workflows, Scikit-learn, pandas, Feature Engineering, Statistical Analysis, Python, SQL, PostgreSQL, PyMOL, UCSF Chimera, AutoDock, AlphaFold, Power BI, Tableau

Soft Skills Analytical Thinking, Problem-Solving, Research Skills, Attention to Detail, Team Collaboration, Time Management, Innovation

Languages English, Hindi
